

On the Subject of Poetry

Will you write your way into her heart?

- You will see a member of the Poetry Club on the module.
Write a poem for her using her favorite words.
- To determine the correct word(s) out of the 6 words provided on the module, calculate the distance **between the name of the shown girl and each word** using the table below.
- To calculate the distance between two words, start from the cell containing the first word and jump from one cell to a **horizontally or vertically (not diagonally)** neighboring cell. Count the minimum number of jumps needed to reach to the cell containing the second word.
- Pick **any** word with the **least distance** to advance. After picking 3 words correctly module will be disarmed. Picking a wrong word will result in a strike and the words will reset.

Melanie	Jane	Hana	Lacy
			

Melanie	clarity	flow	fatigue	hollow	Jane
energy	sunshine	ocean	reflection	identity	black
crowd	heart	weather	words	past	solitary
